Professional Experience

Full-Stack developer at [Séraphin Legal](#)

📍 Paris, France

📅 June-July 2019

Startup that support legal professionals in their digital transformation to create their practices of tomorrow. Worked on the project called 'Registre Général' as a web developer.

Education

[EPITA - École Pour l'Informatique et les Techniques Avancées](#) - Engineering school

📍 Paris, France

📅 Started Sep. 2018

Aiming for an engineer degree in computer science. I am currently in third year of five, in the internal section where my classes are taught in English. Courses: Linear algebra, Formal language, Programming, Computer architecture/networks, Probabilities, Statistics...

[Claude Monet](#) - High School

📍 Paris, France

📅 2015-2018

Graduated with scientific 'Baccalauréat' with honors (High School Diploma). Took computing science as minor, called 'ISN' as for computer and digital science ('Informatique et Science du Numérique' in french).

Projects

[OCR](#) 2019

OCR stands for Optical Character Recognition. A project made in C, with the use of a basic neural network trained, allows you to recover the text in the image of a printed text.

[Uprising](#) 2019

'Uprising' is a first person shooter game, which goals is to jump from platforms to platforms to get to the top of the map, shoot the other players to make them fall. The last player remaining wins.

[Registre Général](#) 2019

'Registre Général' is a web application for centralizing and managing our companies. Its primary advantage is the tokenization (BlockChain) of corporate records and documents.

[Time is Monet](#) 2019

'Time is Monet' is a 2D platformer made in Python. You are playing a student late to his math lesson. Hurry up! You need to pass through the others students in order to be in time.
